MARCO CASSARINO

Computer & Automation Engineer | CS Educator
Feltre (BL), Italy

PROFESSIONAL SUMMARY

Versatile Computer & Automation Engineer and dedicated Computer Science educator with 6+ years of experience delivering technical instruction in software engineering, operating systems, and algorithms. Demonstrates a strong balance of software craftsmanship (Python, Java, C) and modern AI integration, highlighted by the development of **Lemmly**, an AI-driven academic tutoring platform. Proven ability to bridge theoretical complexity with practical, high-impact technical solutions.

EDUCATION

B.Sc. in Computer & Automation Engineering
Università degli Studi eCampus — Novedrate (CO), Italy

- Relevant Coursework: Object-Oriented Programming, Algorithms & Data Structures, Control Systems, Operating Systems, Database Management Systems, Computer Networks.

PROFESSIONAL EXPERIENCE

Computer Science Teacher / Lecturer
Secondary Education / Technical Institute — Feltre, Italy | *2018 – Present*

- Designed and delivered comprehensive curricula covering core computer science principles, structured programming (C, Java, Python), and Linux system fundamentals.
- Guided 200+ students through hands-on laboratory sessions, emphasizing clean code, algorithmic thinking, and collaborative development using Git.
- Evaluated technical assignments and developed individualized learning pathways, consistently fostering problem-solving skills and academic achievement.
- Implemented modular software components under Linux, testing and optimizing response reliability and user learning retention.

FEATURED TECHNICAL PROJECTS

Lemmly — AI-Powered Personalized Academic Tutor | *Python, LLM APIs, Prompt Engineering, Linux*

- Architected an intelligent tutoring platform engineered to assist university students in mastering demanding subjects through tailored study dialogues.
- Designed structured prompt engineering pipelines and guardrails to ensure pedagogically sound, hallucination-resistant explanations and step-by-step guidance.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, Bash / Shell Scripting
- **Systems & Infrastructure:** Linux OS, System Administration basics, Computer Architectures, Control & Automation fundamentals
- **Development Tools & Methodologies:** Git, GitHub, Prompt Engineering / LLM Integration, Object-Oriented Design (OOD), Debugging & Testing
- **Languages:** Italian (Native), English (B1 — Technical & Professional Reading/Writing), French (A2 — Elementary)
