© Università degli Studi eCampus - Via Isimbardi 10 - 22060 Novedrate (Co) - C.F. 9002752130 - Tel: 031.79421 - Fax: 031.7942501 - Mail: info@uniecampus.it

JOB SEEKING

- **The job**: requirements, payment, benefits, advantages, disadvantages
- **The candidate**: strengths and weaknesses, ambitions
- **Documents**: application form, CV, motivation letter, covering letter, letter of recommendation
- **Interview**: how to prepare, what to say, what to ask, how to behave

THE RECRUITMENT PROCESS

- When a company needs to **recruit** or employ new people, it may decide to advertise the job or **position**.
- People who are interested can then **apply for** the job by sending in a **letter of application** or **covering letter** (US **cover letter**) and a **curriculum vitae** or **CV** (US **résumé**) containing details of their education and experience.
- A company may also ask candidates to complete a standard **application form**.

THE RECRUITMENT PROCESS

- The company's Human Resources department will then select the most suitable applications and prepare a **short list** of **candidates** or **applicants,** who are invited to attend an **interview.**
- Very possibly the people interviewing will be interested in the **qualifications** the candidates gained at school or university and what **experience** they have had in previous jobs.
- They will probably ask **for references** written by the candidates' teachers and employers.

THE RECRUITMENT PROCESS

- Another way for a company to **hire** is by using the services of a **recruitment agency** (US **search firm**) who will provide them with a list of suitable candidates.

GUIDELINES FOR WRITING YOUR CV

- It can take a reader just 30 seconds to reach a decision about a CV.
- When writing a CV, you should remember you have just half a minute to gain the reader's interest, leave a clear impression of professionalism and indicate the likely benefit to an employer of hiring you.
- To prepare a CV which is effective will take time and possibly several drafts.
- Layout, presentation and a choice of words which demonstrate both responsibility and achievement are vital components of any CV.

GUIDELINES FOR WRITING YOUR CV

- No matter how well your career background and skills match the needs of an employer, your efforts could fail if you make it difficult for the reader to take in the relevant information.
- As your message must register quickly, make the reader’s task an easy one.
- Ensure that the print is well spaced and that the key information is displayed clearly.

GUIDELINES FOR WRITING YOUR CV

- The purpose of the CV is to generate interviews.
- Visually, you want your CV to have a positive effect, but it is also necessary for it to convince the reader that you are worth meeting.
- The style in which you present your CV is a matter of personal choice, but it is important that you use words which suggest an active and successful career.

GUIDELINES FOR WRITING YOUR CV

- People sometimes make the mistake of regarding a CV as a rewrite of their job description, which results in unnecessary jargon and detail.
- In addition, issues such as salary and reasons for leaving previous employers should not be included; they are best discussed at the first interview stage.

THANK YOU FOR YOUR ATTENTION!

HOW TO WRITE A COVER LETTER 1.

Read the following text.

Here are the steps you can follow to write an effective cover letter:

Include contact information

You can include your contact information at the top of your cover letter. This includes your name, email address and phone number so hiring managers know how they might contact you. You can also include the date to show when you write the cover letter.

Introduce yourself

In the opening paragraph, you can introduce yourself in a few sentences by describing who you are and mentioning your top qualities. In this part of the cover letter, you can also reference the specific position for which you're applying and why you're interested in it. If you're still in school, you can mention your anticipated graduation date.

Highlight your traits and achievements

In the next few paragraphs, you can show that you understand the specific requirements listed in the job description and show how your traits match them. For example, if the job description requests you understand how to create and modify blueprints, you can talk about specific situations where you created them and what impact that had on a project. Since some of this information might already be on your resume, consider providing new

information or context to your responsibility to avoid repetition. This is your opportunity to show why you're right for the position.

Write a conclusion

Your closing is your opportunity to reiterate your interest in the position and share any final details. You might repeat, in a unique phrase, why you have an interest in the position. You can also summarize your top qualifications to ensure hiring managers remember these. In the conclusion, consider providing the best way that a hiring manager can reach you and offer them the opportunity to contact you with any questions they may have about you or your qualifications.

HOW TO WRITE A COVER LETTER 2.

Read the following text.

Reference the company

Each time you apply for an engineering job, it can benefit you to adapt your materials to the specific company and role. Your cover letter provides you with an opportunity to reference specific details about the company or role that interests you. Consider browsing the company website to better understand its values and mission. You can then mention these in the cover letter to show that you've researched the company and reiterate why you fit the role.

Highlight your skills

Though you may include a specific section of skills on your resume, you can expand on these in your cover letter. This means showing how you applied certain qualities to achieve results. Soft skills like problem-solving, attention to detail, communication and project management can be essential for engineering positions. With engineering skills, you can show your capabilities in areas like civil, electrical or mechanical engineering.It can help to show what tools you use to perform your duties, too. Analysis and mapping software, design software and enterprise applications can encourage hiring managers to notice you as a candidate who can start working sooner. Consider reviewing the job description to see if there are any technical skills or software requirements you might discuss in your cover letter.

Proofread your document

Proofreading your document is one way to show your attention to detail to hiring managers. As an engineer, details are essential when measuring, mapping and communicating. Consider reviewing your letter for grammar, punctuation and spelling. You might also ensure your contact information matches what's on your resume. Printing your document out can help you review it from another perspective and notice any potential revisions you can make.
