What's The Weather Like? – Audioscript 1

Have you ever noticed how people seem to love talking about the weather?
Whether they're standing in the grocery line checkout, or meeting new people at a party, the weather is the popular conversation starter.

Weather is also a current topic for **small talk**, in a business meeting for example. This could be because the weather is different from day to day and from place to place, and it is a relevant subject for everyone.
That's why most English-speaking people keep updated with the latest weather news.

But, of course, you need words to describe the weather, and some idioms and sayings can **come in handy**.
I'm sure you all know the adjectives: cold, cool, freezing, hot, warm, **boiling**, etc.

There is ONE word I'd like to underline, that is necessary you get right, and that word is *SUNNY*. The word *sunny* is used when there is a bright sun out there in the sky. It's sunny!

Let's see, when it's raining a lot, we can say **it's raining cats and dogs**! I know, why this expression? I looked it up, but there are too many different explanations **out there**, and I **gave up**.
We can also say, it's **pouring rain**, same meaning as **it's raining heavily**. And when this happens and I don't have an umbrella, I get **soaking wet**, I mean, I get **extremely wet**!

10. Listening 1 Script

Sometimes, there are **few drops** of rain, it's raining lightly, well, it's **drizzling**. But have you ever experienced a **heatwave**? It's unusual hot weather. And it's **humid**, or **muggy**, when you feel warm and **damp** in an **unpleasant** way.

Snow **is not my thing**, or as the British say, **it's not my cup of tea**! When it snows heavily, and the temperatures drop to below 0°C, ice forms on the **ground**. And the roads get **icy** and **slippery**.

It's quite annoying when it's windy, but pleasant if there's a breeze on a hot day. A very strong wind, instead, is a **gale.**
